Weekly Coal Production

Production for Week Ended:
June 28, 1986

Highlights

U.S. coal production in the week ended June 28, 1986, as estimated by the Energy Information Administration, totaled 17.49 million short tons (bituminous coal and lignite, 17.42 million short tons; Pennsylvania anthracite, .07 million short tons). This was 0.3 percent lower than the previous week, and was 1.7 percent lower than production in the corresponding week of 1985.

Cumulative U.S. coal production from January 1 through June 28, 1986, was estimated at 433.40 million short tons, 2.0 percent below the 442.36 million short tons produced in the comparable period in 1985.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)), released for publication on October 15, 1984.

Figure 1. Coal Production

Table 1. Coal Production

Production and Carloadings	Week Ended			Year to Date Ended		
	06/28/86	06/21/86	06/29/85	06/28/86	06/29/85	Percent Change
Production (Thousand Short Tons)						
Bituminous ¹ and Lignite	17,415	17,470	17,691	431,618	440,468	-2.0
Pennsylvania Anthracite	72	72	101	1,777	1,893	-6.1
U.S. Total	17,487	17,543	17,792	433,396	442,361	-2.0
Railroad Cars Loaded	115,220	115,422	117,406	2,863,130	2,873,931	

¹Includes subbituminous coal.

Note: 1985 and 1986 data are preliminary. Total may not equal sum of components because of independent rounding.
